Career Objective

I want to specialize particularly in developing web-based applications and producing user-focused solutions in the field of software development. I have a solid foundation in programming languages such as C++, Java, and Python. At the same time, I have gained experience in data management by working with databases like MySQL and SQLite. I am a software developer candidate who is team-oriented, open to learning, and has strong analytical thinking skills. My goal is to continuously improve myself in the software world and take part in creative and sustainable projects.

Education

Doğuş University – Software Engineering (3rd Year)

2022 – Present

GPA: 2.94 / 4.00

Certificates & Courses

GOIT Fullstack Developer Course – Completed (08.08.2025)

Frontend: HTML, CSS, JavaScript, React, Redux Toolkit, Responsive Design

Backend: Node.js, Express.js, REST API, Authentication & Authorization

Extras: TypeScript, Git, Docker, Swagger/OpenAPI, Career & Soft Skills

Technical Skills

- Programming Languages: C++, Java, Python
- Databases: MySQL, SQLite, MS SQL
- Tools: MATLAB, Visual Studio, Visual Studio Code, SSMS, Git

Internship & Work Experience

Ideal Çözüm Software Technologies Ltd. – Istanbul

Software Intern (05.08.2025 – 01.09.2025)

- Designed and developed an Inventory/Stock Tracking System project from scratch.
- Developed backend APIs using .NET Core and MS SQL.
- Built the user interface with React + MUI; implemented features such as product listing, filtering, category and brand management.
- Independently managed version control via GitHub and prepared the project documentation.
